Product Overview

nbn™ Enterprise Ethernet

nbn™ Enterprise Ethernet from TasmaNet offers organisations of all sizes a cost-effective upgrade to superfast and dependable dedicated fibre.

→ Enable your business with superfast fibre connectivity direct to your door

Get the enterprise grade, superfast, and dependable Internet every business or school needs to compete in a hyper-connected, data-dependent world.

90% of Australian businesses can now upgrade to dedicated fibre with \$0 nbn™ fibre build cost*, unlocking networking, cloud, and data protection solutions to enable your business growth.

→ Power next-generation productivity

nbn™ Enterprise Ethernet from TasmaNet delivers symmetrical upload and download speeds from 10/10 Mbps up to nearly 1000/1000 Mbps so you can seamlessly operate bandwidth-intensive applications like IP voice and video conferencing.

For a limited time, upgrade to superfast fibre with \$0 nbn™ fibre build cost and get up to \$1,000 TasmaNet credit![^]

→ Connect with the market leader

nbn™ Enterprise Ethernet is a game-changer for organisations struggling with congested internet, using outdated connection technology, or faced with limited connectivity options due to their location.

TasmaNet connected the first nbn™ Enterprise Ethernet service anywhere in Australia and now we're helping schools and businesses around the country level the playing field with superfast fibre to their sites.

→ Digital solutions to boost your productivity and protect critical business data

TasmaNet Business Voice

Keep your people connected to your customers with powerful SIP Trunking and our flexible cloud PBX solution that scales as your business grows.

Secure Networking

Connect your sites and people nationally with a cohesive and highly redundant secure private network using fibre and wireless connectivity.

Next Generation Firewall

Combat increasingly complex business security challenges and protect your entire network and every user - wherever they work.

Backup for Microsoft 365

Enable collaboration while protecting against accidental data deletion and retention policy gaps to meet business legal and compliance requirements.

TasmaNet Core® Private Cloud

Built to meet the performance and availability expectations of enterprise and government, easily self-manage your workloads and expenditure.

Cloud Backup

Deploy a secure offsite backup schedule that suits your business operations, access and recover your data any time with our easy self-management portal.

→ Supporting multi-site collaboration with ADW Johnson

ADW Johnson employs more than 100 civil engineering design, town planning, surveying, and project management specialists across New South Wales, with offices in Sydney, the Central Coast, and Newcastle.

The ability to send and receive large files, collaborate using cloud software, and securely backup data depends on quality connectivity, challenges made more complex by the industry-specific data-heavy tools and applications ADW Johnson relies on.

Thanks to their TasmaNet nbn™ Enterprise Ethernet solution, ADW Johnson can have upwards of 80 employees connected concurrently via remote Virtual Private Network to centralised servers and files, making collaboration much simpler and more efficient. Learn more at www.tasmanet.com.au/case-studies.
