# Core IaaS Private Cloud

## → Elevate your business to the cloud

TasmaNet Core Infrastructure-as-a-Service (IaaS) lets you transition to the cloud while leaving you in control of your business data and ICT expenditure.

Let your IT team focus on supporting strategy and innovative projects that drive growth without being burdened by the management and cost of on-premise hardware.

## → Dependable performance

Our cutting-edge private cloud is built to meet the high-performance, high-availability expectations of our enterprise and government customers, backed by industry-leading service levels and support from the expert team that developed and run the platform.

The TasmaNet Core platform runs on infrastructure from our world-class partners including HPE, VMware, and Veeam, and is highly redundant, ensuring hardware failures do not impact customer workloads.

## → Manage workloads and expenditure

The TasmaNet Core portal makes deploying, monitoring, and managing virtual machines easy with customisable approval workflows available to meet your business requirements.

Management tools offer familiar functionality such as power functions, snapshots, and console, while portal dashboards provide one-stop visibility over workload performance, optimisation, and expenditure.

## → Secure from our Core to your site

Your primary and backup data is encrypted at rest and transmitted only over private networks from our secure data centres, and our integrated Software Defined Networking solution provides you with granular security within the TasmaNet Core platform.

All trademarks are the property of their respective owners.

## Product Overview

TasmaNet Core IaaS is a secure, high-performance, and cost-effective alternative to on-premise server hardware for medium and large business.

SMALL

MEDIUM

LARGE

### HIGH AVAILABILITY PERFORMANCE

The Core IaaS platform is built for enterprise workloads and runs on high-performance HPE server and storage infrastructure.

### ONE STOP MANAGEMENT

Deploy, optimise, and monitor your virtual machine workloads in minutes using our custom Core portal interface.

### INTEGRATED NETWORKING

Secure and high-speed private networking connects your business sites directly into the TasmaNet Core cloud environment.

### CONTROL EXPENDITURE

Simple consumption pricing replaces hardware and maintenance cost spikes with one predictable monthly invoice.

### END TO END EXPERT SECURITY

We built and support the networks, secure data centre, and integrated Software Defined Networking solution for Core IaaS.
