

# Backup for Office 365

## → Take control over your Office 365 data.

Veeam Backup for Microsoft Office 365 gives you the ability to protect your Office 365 data from accidental deletion, security threats and retention policy gaps, quickly restore individual Office 365 items, and meet legal and compliance requirements with efficient eDiscovery of Office 365 backup archives.

## → High-Availability does not protect from the risk of data loss.

Since Microsoft Office 365 is a Software as a Service (SaaS) platform its primary data protection focus is ensuring availability which reduces the risk of downtime.

The size and scale of the Microsoft Office 365 platform provides redundancy and high-availability. This means that for each piece of data a subscriber saves on Office 365, multiple copies are replicated to alternate data stores across multiple data centres.

This data protection solution ensures a subscriber's data is protected from environmental threats such as hardware or software failure, natural disasters and power outages which could put the integrity and availability of data hosted on the Office 365 platform in jeopardy. In addition to mitigating environmental threats and ensuring high-availability, Office 365 also protects data through retention policies.

## → It's your data — you control it — and it is your responsibility to protect it.

The standard Microsoft data protection offering on Office 365 does not cover all the bases. If an organisation relies on these measures exclusively, there is a real risk of data loss. The data retention feature on Office 365 is not a substitute for a comprehensive data backup solution.

Having multiple backup copies of data taken at a point in time is the only real way to ensure you can recover from a data loss incident.

## Product Overview

Veeam Backup for Microsoft Office 365 helps businesses of any size protect Office 365 data from accidental deletion, security threats and retention policy gaps, and restore individual Office 365 items.

SMALL

MEDIUM

LARGE

### PROTECT YOUR DATA

Protect your Office 365 data from accidental deletion, security threats and retention policy gaps.

### MANAGE COMPLIANCE

Meet legal and compliance requirements with efficient eDiscovery of Office 365 backup archives.

### QUICKLY RESTORE FILES

Quickly restore individual Office 365 items and files with industry-leading recovery flexibility.

### HYBRID CLOUD COMPATIBLE

Seamlessly migrate mailbox data between Office 365 and on-premise Exchange, and enable consistent backups of Office 365 archives to streamline eDiscovery and mailbox item-level restores.
